
ALL-IN-ONE, ALL FOR YOU.

IC BUS. THE DIFFERENCE.

Introducing the AC Series from IC Bus. It's truly unlike any small shuttle bus ever built. The AC Series is the first-ever small shuttle that's fully integrated. That means its all-in-one proprietary design is covered from bumper-to-bumper, so you'll deal with only one manufacturer, IC Bus. Our one-stop-shop approach provides everything you need throughout the lifecycle of your bus, including financing, parts, service and warranties.

The AC Series is in a class all by itself when it comes to durability, carrying a lifecycle approximately twice as long as similar small shuttles in the industry. It also brings unmatched serviceability with its full-tilt hood and engine placement. Plus, this revolutionary small shuttle is fully backed by an extensive, experienced and unparalleled dealer network. And drivers will love its refined and responsive handling on the road.

The AC Series also comes with an abundance of features that take comfort to a whole new level, so now you can customize your fleet to your exact needs. Whatever your operations entail, whether it's tour and charter operations, hotel or rental car shuttles, paratransit operations, day care or public transportation, if you're looking for a game changer for how you purchase, maintain and operate your fleet, the fully integrated AC Series is for you.

THE AC SERIES BUS
